

*“Mapped to NSQHS  
Standard 6”*

## Clinical Handover e-Learning Course

Clinical Handover is one of the 10 NSQHS Standards that have been introduced by the Australian Commission on Safety and Quality in healthcare. Since June 2013, it is mandatory that all hospitals across Australia meet the NSQHS standards to achieve accreditation.

A clinical handover e-Learning course co-developed by the University of South Australia and IntelliLearn is now available to organisations and healthcare professionals.

### KEY ADVANTAGES

- Unlimited 24/7/365 staff login access
- No in-house IT issues as the platform is hosted and managed by IntelliLearn
- Staff training takes ~ 1-2 hours
- Comprehensive reporting is provided allowing organisations to track the progress of their staff at any time and as often as they wish
- Real handovers featuring practicing nurses and doctors rather than actors
- Certification of users upon successful completion

### COURSE CONTENT

The course is comprised of four clinical handover scenarios:

**Module 1: Bedside handover**

**Module 2: Nurse to nurse handover**

**Module 3: Nurse to doctor handover**

**Module 4: Nurse to group handover**

Learning materials, “real” sample video handovers and practice & summative quizzes are provided with each module.
